**Subject:** CES - Dana Transport  
**Date:** Tuesday, November 04, 2014 6:54:01 PM

---

**Patricia/Amy:**

**I have been talking with Ruben Fernandez with Dana Transport. They have 6 Frac Tanks on-site that were used by CES for their operations. These Frac Tanks contain oily materials. Also, Dana Transport is on the TCEQ list of potential PRPs. They apparently sent oil waters to the site from there truck cleaning operation and he indicated that it was a significant amount.**

**Ruben has taken samples of these on-site frac tanks and has been discussing disposal of these materials through Lonestar Ecology. The question that Ruben has is that if they dispose of the materials in these Frac Tanks how do they get credit for this when it comes to cost recovery or allocation should they be determined to be a PRP?**

**Thanks**
